

Tejas Mani

Data Science Student

Projects

Built a Python and pandas dashboard for education technology data using SQL and data visualization.

Trained scikit-learn and PyTorch models for machine learning experiments with large language model outputs.

Wrote web scraping scripts with BeautifulSoup and requests to collect public datasets, then analyzed them in N

Skills

Python, pandas, NumPy, scikit-learn, PyTorch, SQL, Git, web scraping, data visualization, machine learning

Interests

large language models, applied AI, education technology, data scientist roles
